

7468VT2PRO RIB

108 Day

HIGHLIGHTS

- Timely harvest is important in the management of this hybrid due to stalk anthracnose concerns
- Avoid fields with history of Goss' Wilt
- Very large kernels and good grain quality
- Responds to high management but also protects yield on tough acres
- Tops will generally come out of this hybrid in early fall

Highly Productive Soils	Recommend	Gray Leaf Spot	Average	Population	MH
Moderately Productive Soils	Highly Recommend	Northern Leaf Blight	Good	High Pop Tolerance	Very Good
Less Productive Soils	Highly Recommend	Southern Leaf Blight	Good	Ear Type	Semi-Determinate
Cold/No-till Soils	Recommend	Eye Spot	N/A	Ear Length	N/A
Drought Tolerance	Good	Goss' Wilt	Fair	Kernel Rows	14-16
Seedling Vigor	Good	Common Rust	Very Good	Test Weight	Very Good
Stalk	Good	Southern Rust	Good	Cob Color	Red
Root	Good	Stalk Anthracnose	Fair	Husk Cover	Short
Greensnap	Very Good	Diplodia	N/A	Drydown	Good
Fall Appearance	Fair	Fungicide Response	High Probability		
Staygreen	Fair	Tar Spot	Average*		
Delayed Harvest	Fair	Physoderma Node Breakage	Good		

Plant Height	Medium
Ear Height	Medium-Low
Silage Appeal	No
Leaf Angle	Erect
Flowering for RM	Early
50% Silk GDU	1309
Black Layer GDU	2683

HERBICIDE TOLERANCE

Glyphosate	Yes
Glufosinate	No
