* Number of proteins targeting a particular pest

R Resistance to one or more of the proteins has been documented. Talk with your local extension about concerns in your area.

Individual results may vary, and performance may vary from location to location and from year to year. This result may not be an indicator of results you may obtain as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible.

Follow all IRM (insect resistance management) to the biotechnology traits expressed in the see as set forth in the technology/stewardship agreements that you sign. By opening a bag of see you are reaffirming your obligation to comply with the most recent stewardship requirements.
