JACOBSEN

HIGHLIGHTS

- A great mix of offensive yield potential and strong disease scores for success on a variety of soil types
- Fungicide will have the best possibility of response when GLS is present
- Excellent movement north, south, east and west.

Highly Productive Soils	Highly Recommend	Gray Leaf Spot	Average	Population	M-MH
Moderately Productive Soils	Highly Recommend	Northern Leaf Blight	Good	High Pop Tolerance	Very Good
Less Productive Soils	Highly Recommend	Southern Leaf Blight	Very Good	Ear Type	Semi-Flex
Cold/No-till Soils	Recommend	Eye Spot	N/A	Ear Length	Average
Drought Tolerance	Very Good	Goss' Wilt	Good	Kernel Rows	16/18
Seedling Vigor	Excellent	Common Rust	Very Good	Test Weight	Very Good
Stalk	Very Good	Southern Rust	Average	Cob Color	Red
Root	Excellent	Stalk Anthracnose	Very Good	Husk Cover	Good
Greensnap	Very Good	Diplodia	Good (Ear)	Drydown	Very Good
Fall Appearance	Good	Fungicide Response	Moderate Probability		
Staygreen	Good	Tar Spot	Poor*		
Delayed Harvest	Good	Physoderma Node Breakage	Average*		

Plant Height	Medium
Ear Height	Medium
Silage Appeal	No
Leaf Angle	
Flowering for RM	Medium-Late
50% Silk GDU	1250
Black Layer GDU	2440

HERBICIDE TOLERANCE

Glyphosate	No
Glufosinate	No
